## WHILE

## 只要符合條件,就會執行

\_\_\_\_\_

## 節例:

## WHILE後面要加入LOOP

```
DECLARE
    a number(2) := 10;
BEGIN
    WHILE a < 20 LOOP
        dbms_output.put_line('value of a: ' || a);
        a := a + 1;
    END LOOP;
END;
/</pre>
```

```
